Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 272, Nos. 1 & 2, April 2005

E. Carreras, E. Boix, S. Navarro, H.F. Rosenberg, C.M. Cuchillo and M.V. Nogués: Surface-exposed amino acids of eosinophil cationic protein play a critical role in the inhibition of mammalian cell proliferation 1–7

S. Morel, C. Berthonneche, S. Tanguy, M.-C. Toufektsian, P. Perret, C. Ghezzi, J. de Leiris and F. Boucher: Early pre-diabetic state alters adaptation of myocardial glucose metabolism during ischemia in rats 9–17

P.M. Baldini, P. De Vito, F. D'aquilio, D. Vismara, F. Zalfa, C. Bagni, R. Fiaccavento and P. Di Nardo: Role of atrial natriuretic peptide in the suppression of lysophosphatydic acid-induced rat aortic smooth muscle (RASM) cell growth 19–28

H.G. Preuss, B. Echard, M. Enig, I. Brook and T.B. Elliott: Minimum inhibitory concentrations of herbal essential oils and monolaurin for gram-positive and gram-negative bacteria 29–34

Z. Zhang, T. Weinschenk and H.J. Schluesener: Uptake, cellular distribution and novel cellular binding proteins of immunostimulatory CpG oligodeoxynucleotides in glioblastoma cells 35–46

P.-A. Chang, Y.-J. Wu, R. Chen, M. Li, W. Li and Q.-L. Qin: Inhibition of neuropathy target esterase expressing by antisense RNA does not affect neural differentiation in human neuroblastoma (SK-N-SH) cell line 47–54

F. Correa and C. Zazueta: Mitochondrial glycosidic residues contribute to the interaction between ruthenium amine complexes and the calcium uniporter 55–62

S. Jesmin, Y. Hattori, H. Togashi, K.-I. Ueno, M. Yoshioka and I. Sakuma: Age-related changes in cardiac expression of VEGF and its angiogenic receptor KDR in stroke-prone spontaneously hypertensive rats 63–73

H.-L. Hsiao and Y. Su: Identification of the positive and negative *cis*-elements involved in modulating the constitutive expression of mouse thymosin β_4 gene 75–84

M. Bianchi, S. De Lucchini, M. Vietri and E. Villa-Moruzzi: Reciprocally interacting domains of protein phosphatase 1 and focal adhesion kinase 85–90

L. Sun, S. Gu, Y. Sun, D. Zheng, Q. Wu, X. Li, J. Dai, J. Dai, C. Ji, Y. Xie and Y. Mao: Cloning and characterization of a novel human phosphatidic acid phosphatase type 2, *PAP2d*, with two different transcripts *PAP2d_v1* and *PAP2d_v2* 91–96

S.-P. Yang, H.-J. Lee and Y. Su: Molecular cloning and structural characterization of the functional human thymosin β_4 gene 97–105

S. Shetty: Regulation of urokinase receptor mRNA stability by hnRNP C in lung epithelial cells 107–118

T. Muto, Y. Hotta, K. Miyazeki, H. Ando, N. Ishikawa, T. Hasegawa, Y. Sugimoto, J. Yamada and Y. Miki: Protective effects of sarpogrelate, a 5-HT_{2A} antagonist, against postischemic myocardial dysfunction in guinea-pig hearts 119–132

M. Linetsky and R.D. LeGrand: Glutathionylation of lens proteins through the formation of thioether bond 133–144

V. Chauhan, A.M. Sheikh, A. Chauhan, W.D. Spivack, M.D. Fenko and M.N. Malik: Regulation of high molecular weight bovine brain neutral protease by phospholipids *in vitro* 145–149

G. Vani and C.S.S. Devi: Effect of histone H1 on estrogen receptor status of human breast cancer MCF 7 cells 151–155

B. Ramachandran and S. Subramanian: Amelioration of diabetic dyslipidemia by macrocyclic binuclear oxovanadium complex on streptozotocin induced diabetic rats 157–164

V.V. Mohanan, F. Chathu and C.S. Paulose: Decreased 5-HT_{2C} receptor binding in the cerebral cortex and brain stem during pancreatic regeneration in rats 165–170

K.P. Devi, M. Sreepriya, K. Balakrishna and T. Devaki: Protective effect of *Premna tomentosa* extract (L. verbanacae) on acetaminophen-induced mitochondrial dysfunction in rats 171–177

E. Selvakumar, C. Prahalathan, Y. Mythili and P. Varalakshmi: Mitigation of oxidative stress in cyclophosphamide-challenged hepatic tissue by DL-α-lipoic acid 179–185

D. Kong, L. Xu, Y. Yu, W. Zhu, D.W. Andrews, Y. Yoon and T.H. Kuo: Regulation of Ca^{2+}-induced permeability transition by Bcl-2 is antagonized by Drp1 and hFis1 187–199

M. Chatterjee and D. Chatterjee: Developmental changes in the neuronal protein composition: A study by high resolution 2D-gel electrophoresis 201–207

T.C. Vary and C.H. Lang: IGF-I activates the eIF4F system in cardiac muscle *in vivo* 209–220

G.J. Gross and S.F. Lockwood: Acute and chronic administration of disodium disuccinate astaxanthin (Cardax™) produces marked cardioprotection in dog hearts 221–227
